NRG and Sandia file new patent for GHG reduction in oil production

Sandia National Laboratories (“Sandia”) and NRG Systems, Inc. (“NRG”) reduces oilfield greenhouse gas emissions while increasing revenue: the method also tracks reduction of Environmental, Social, and Governmental [ESG] risk. Well location, construction, and production practices are modified to simultaneously improve environmental and financial performance. NRG plans an offering of the technology to oil companies, lenders, investors, and regulatory authorities.

NRG Systems, Inc. is a privately held Delaware corporation established in 1989, providing technology development solutions for the global energy industry.
