NRG Systems announce that Patrick V. Brady, PhD has joined the company.

NRG Systems, Inc. (“NRG”) is pleased to announce that Patrick V. Brady, PhD has joined the company after retiring as Senior Scientist from Sandia National Laboratories where he led Sandia programs in enhanced oil recovery, carbon capture, water treatment, and geochemistry. Pat formerly represented Sandia in its Cooperative R&D enhance oil recovery partnership with NRG. In that capacity he helped build NRG’s technical foundation and is named Inventor or Co-Inventor on each of the NRG patents. As investor and Director of Technology at NRG, he will focus on expansion and implementation of NRG’s enhanced oil recovery and low carbon oil production technology portfolio.

Pat went to the University of California at Berkeley on a football scholarship [2 year starting Center] and graduated with a Bachelor’s in Geology; received his PhD from Northwestern in 1989; did a post-doc at the Swiss Federal Institute of Technology/Swiss Water Treatment Institute [EAWAG] in 1990; and was an Asst. Professor of Geology at SMU before going to Sandia in 1993. He’s authored/co-authored/edited ~ 100 peer-reviewed journal articles and books, and 21 patents.
